

Coding & Solution

Date	25 September 2026
Team ID	6ab2220abee0b08a2d2c65d0
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	5 Marks

This section evaluates the quality and completeness of your implemented code and the overall solution.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/shabarithasan/Auto-Ticket-Classification
Programming Language(s)	Server-Side JavaScript, Node.js
Framework(s) Used	ServiceNow Platform, Express.js
Key Features Implemented	Auto-classification via keyword parsing, email notification via Flow Designer, REST API wrapper
Pending / Incomplete Features	None - all planned features implemented
Setup / Run Instructions	1. Clone repo 2. cd Code files 3. npm install 4. node index.js 5. Import ServiceNow Update Set XML

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes: The core auto-classification logic is implemented as a ServiceNow Business Rule that triggers on record insert. The Express.js wrapper provides an external REST interface for submitting tickets programmatically.
