

Project Executable Files

Date	25 September 2026
Team ID	6ab2220abee0b08a2d2c65d0
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	3 Marks

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project file and folder structure below:

```
Auto-Ticket-Classification/  
+-- Code files/  
|   +-- index.js  
|   +-- package.json  
|   +-- .env  
+-- 1. Brainstorming and Ideation/  
+-- 2. Requirement Analysis/  
+-- 3. Project Design Phase/  
+-- 4. Project Planning Phase/  
+-- 5. Project Development Phase/  
+-- 6. Project Testing/  
+-- 7. Project Documentation/  
+-- 8. Project Demonstration/  
+-- README.md
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://dev399490.service-now.com (ServiceNow Developer Instance)
Login Credentials (Demo)	Username: admin Password: [Instance-specific, provided on request]
Platform / Hosting Provider	ServiceNow Cloud (SaaS Platform)
Repository Link	https://github.com/shabarithasan/Auto-Ticket-Classification
Demo Video Link	[Uploaded to Google Drive - link shared in submission form]

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Clone the repository: git clone https://github.com/shabarithasan/Auto-Ticket-Classification.git
2. Navigate to Code files: cd Auto-Ticket-Classification/Code files
3. Install dependencies: npm install
4. Create .env file with SN_INSTANCE, SN_USERNAME, SN_PASSWORD

- 5. Start the Express server: node index.js
- 6. For the ServiceNow backend: Log in to your developer instance and import the Update Set XML.
- 7. Submit a test ticket via the Service Portal or POST /api/tickets endpoint.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Developer instance hibernates after inactivity	Wake up instance from ServiceNow developer portal before testing
2	Hard-coded keyword matching only	Future upgrade to Predictive Intelligence (ML) planned
3	No multi-language support	Currently English only; planned for Phase 3 roadmap
