

Technology Stack

Date	25 September 2026
Team ID	6ab2220abee0b08a2d2c65d0
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. Fill out the table below to detail the specific technologies chosen for each component and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	ServiceNow Service Portal (AngularJS-based)	Native to ServiceNow; responsive design; no extra frontend framework needed.
2	Backend / Server-Side	Server-Side JavaScript (ServiceNow Glide API)	Runs natively on ServiceNow; direct access to GlideRecord for DB operations.
3	Database / Data Storage	MariaDB (ServiceNow native)	Built into ServiceNow; handles relational data with strong indexing and ACL support.
4	Cloud / Hosting / Deployment	ServiceNow Cloud (SaaS Platform)	Zero infrastructure management; auto-scaling; SOC 2 / ISO 27001 certified.
5	Version Control & CI/CD	GitHub (Public Repository)	Industry-standard collaboration; free hosting; easy sharing with evaluators.
6	Third-Party APIs / Other Tools	Express.js (Node.js) axios, cors, dotenv	Provides external REST endpoint for programmatic ticket submission from any client.
