

Scalability & Future Plan

Date: 25 September 2026

Team ID: 6ab2220abee0b08a2d2c65d0

Project Name: Auto Ticket Classification using Flow Designer

Maximum Marks: 1 Mark

Scalability & Future Plan: Outlines how the solution scales.

Because this solution is built entirely on the ServiceNow platform, it inherently scales to handle millions of enterprise records without additional infrastructure overhead. Future plans include transitioning from hard-coded string parsing (indexOf) to Predictive Intelligence (Machine Learning) once enterprise licensing is acquired, allowing the system to learn from historical ticket resolutions.
