

Project Design Phase

Problem – Solution Fit Template

Date	25 September 2026
Team ID	6ab2220abee0b08a2d2c65d0
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Problem - Solution Fit Canvas:

Project Design Phase Problem – Solution Fit Template

Date	15 February 2025	Project Name	Auto Ticket Classification
Team ID	ServiceNow-Auto-01	Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem.

1. THE PROBLEM SPACE (Customer)	2. THE SOLUTION SPACE (Product)
CUSTOMER SEGMENT(S) CS - End Users: Employees facing IT issues (e.g., broken WiFi, software bugs). - IT Support Agents: Level-1 Helpdesk technicians bogged down by manual sorting.	PROPOSED SOLUTION PS An automated ServiceNow Flow Designer rule that scans the "Short Description" field for key terms and instantly assigns the Category, Subcategory, and Assignment Group.
CUSTOMER PROBLEMS & PAINS CP - Tickets sit unassigned in a generic queue for hours. - Users don't know technical jargon to categorize tickets themselves. - IT agents spend 20%+ of their day just routing tickets to other teams.	SOLUTION FEATURES & GAIN CREATORS SF Zero-Touch Triage: IT agents never touch a misrouted ticket again. Keyword Triggers: "WiFi" routes to Network; "Projector" routes to Hardware. Auto-Notification: User instantly receives a confirmation email.
AVAILABLE SOLUTIONS (Alternatives) AS - Forcing users to pick from a 50-item dropdown (causes user frustration & errors). - Hiring a dedicated human "Dispatcher" just to read and route tickets (expensive).	KEY METRICS (Success Criteria) KM MTTR (Mean Time to Resolve): Reduced by at least 25%. Routing Accuracy: 90%+ of tickets bypass Level 1 manual triage.
