

User Acceptance Testing (UAT) Template

Date	25 September 2026
Team ID	6ab2220abee0b08a2d2c65d0
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	10 Marks

1. Executive Summary

This document summarizes the User Acceptance Testing (UAT) activities conducted for the Auto Ticket Classification project on the ServiceNow platform. Testing covered all major functional areas, including keyword detection, case-insensitivity, email notification triggers, and manual fallback for unmatched keywords. The system met all acceptance criteria.

Overall UAT Status: PASSED - READY FOR DEPLOYMENT

2. Test Execution Summary

Metric	Count / Value
Total Test Cases Executed	20
Test Cases Passed	20 (100%)
Test Cases Failed	0
Defects Logged	1 (Resolved)
UAT Sign-off Status	Approved

3. Detailed UAT Test Results

Test ID	Scenario	Test Steps / Expected	Actual Result	Status
TC-01	Network Classification	Input: "wifi not working" Expected: Network / Wi-Fi	Category correctly set to Network / Wi-Fi instantly.	PASS
