

Problem-Solution Fit

Date: 25 September 2026
Team ID: 6ab2220abee0b08a2d2c65d0
Project Name: Auto Ticket Classification using Flow Designer
Maximum Marks: 5 Marks

Problem-Solution Fit Canvas: Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience.

Target Audience Limitations & Pains	Proposed Solution Features
IT Agents spend hours manually reading basic tickets.	Automated keyword parsing categorizes tickets instantly.
High risk of human error causing delayed ticket routing.	Rule-based logic ensures 100% accurate routing for known issues.
End-users wait hours to know their ticket is assigned.	Flow Designer triggers an instant email confirmation to the user.
Complex drop-down forms confuse end-users.	Users simply type their issue naturally; the backend does the work.
