

Scalability & Future Plan

Date: 25 September 2026
Team ID: 6ab2220abee0b08a2d2c65d0
Project Name: Auto Ticket Classification using Flow Designer
Maximum Marks: 1 Mark

Scalability & Future Plan: This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Hard-coded keyword matching only	Cannot handle synonyms or new terms automatically	High
2	Single ServiceNow instance	Limited to dev instance capacity	Medium
3	No multi-language support	Only English keywords are parsed	Low

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Single developer instance	Migrate to enterprise production instance
2	Data Storage	MariaDB on ServiceNow cloud	No change needed, auto-scales with license
3	Performance	Sub-second response time	Add caching for frequent keyword lookups
4	Security	Basic ACL rules	Implement role-based access & 2FA

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Expand keyword dictionary to 50+ terms	Q1 2027	Higher classification accuracy
Phase 2	Integrate Predictive Intelligence (ML)	Q2 2027	Auto-learn from historical tickets
Phase 3	Multi-language ticket support	Q3 2027	Serve non-English users
Phase 4	Dashboard & analytics for ticket trends	Q4 2027	Management visibility
